Many investors who take this approach hire a portfolio manager to handle the buying and selling of the stocks in their portfolio in exchange for a percentage of the profits. Active investing is more about taking advantage of the fluctuating values of specific stocks over time. For instance, a good active investor might buy stock in a company for a fairly low price during a period when the company is struggling. They would keep an eye on the company over time, waiting for its stock price to surge during a particularly good business period. By selling the stock at a higher price than they bought it, these investors can make a good deal of money, so long as they play their cards right. In short, while active investing may be more lucrative, it requires great instincts, thorough knowledge of market trends, and some luck. As a college student dating my husband, his exercise induced asthma seemed like only a minor inconvenience that struck mostly when the weather was too chilly. As a parent to four TEENren, three of whom fight asthma, I have learned firsthand about the terror you feel when your TEEN can't get enough oxygen. Asthma is no longer an occasional nuisance to me, but a constantly present enemy that I have to vigilantly battle against with daily preventatives, rescue inhalers, and occasional steroid treatments. It sounds pretty terrifying, but seems mild in comparison to what I often witness in the course of a work day. S&P Dow Jones Indices. " S&P 500." Accessed Oct. 29, 2021.
