Tramadol a Meperidine is not recommended for chronic pain because of the potential for accumulation of the neurotoxic metabolite, normeperidine, and a potentially fatal drug interaction with monoamine oxidase. in smaller doses **tramadol** and **hydrocodone** should be alright to **take** together. **tramadol** is a non narcotic pain reliever while **hydrocodone** is a narcotic. Both used to treat moderate to severe pain. Both these medications have the same response to your body. they both work with your central nervous system to get rid of pain. It generally isn't recommended to **take tramadol** and Norco (**hydrocodone/acetaminophen**) within 4 to 6 hours of each other. **Tramadol** and **hydrocodone** are opioid agonists and **taking** both around the same time **can cause** additive side effects, such as: Overview. **Tramadol** and **hydrocodone** are two types of potent pain relievers called opioid analgesics. They're often used to treat moderate to severe pain, such as long-term pain related to cancer. Those prescribed **tramadol** had a higher risk of death than those prescribed anti-inflammatory medications. For example: naproxen: 2.2% of the **tramadol** group died vs. 1.3% of the naproxen group. diclofenac: 3.5% of the **tramadol** group died vs. 1.8% of the diclofenac group. etoricoxib: 2.5% of the **tramadol** group died vs. 1.2% of the etoricoxib group. I've tried **tramadol** and ultram, but they make me sick and don't do much for the pain either. Darvocet, Norco, and Vicoden are also out as the generics of them are also **hydrocodone**. Most likely anything with codeine is out as the pharmacist said I'm probably **allergic** to it as well. What else **can I take**? Hi hun, Ive talked to my specialist before about this problem and he cut my **Tramadol** 50mg down to **Tramadol** 37.5 mg. **Tramadol** 37.5 doesnt work for the pain though, so I was forced to use the **Tramadol** 50mg. Also told him that I sometimes have problems breathing when **I take** the **Hydrocodone** but he did not replace it with anything else. I'm **allergic** to **Hydrocodone**. What pain meds **can I take** that do not have this in them? I'm not familiar with pain meds and my family doc said that's all he could proscribe so I'm in a bind and need some help..
