Most Linux distributions have Eclipse packaged already and you can probably use your package manager to install it. Your mileage may vary in getting it to work. Personally, I've had issues getting Eclipse plugins to work correctly because updating plugins sometimes breaks the way the packager packaged the main app, and sometimes plugins want a newer

version of Eclipse (Ubuntu ships an older version), so I use a copy of Eclipse downloaded from eclipse.org rather than the one Ubuntu ships. 3. LuckPerms Add ranks to your server and restrict/allow access to commands. Make sure that you are running a Spigot or CraftBukkit Minecraft server. Download a Bukkit.jar file from a trusted source.
